

CLAIMS

1 A vinyl chloride resin composition having excellent weatherability and impact resistance which comprises:

(a) 100 parts by weight of a vinyl chloride resin,

(b) 1 to 10 parts by weight of a graft copolymer which is obtained by polymerizing 25 to 75 parts by weight of a graft monomer component to 25 to 75 parts by weight of a crosslinked elastomeric polymer so that the total thereof is 100 parts by weight, and the methyl ethyl ketone-soluble portion of which has an η_{sp}/c of 1 to 5 measured at 30°C with respect to its 0.2g/100cc acetone solution,

SUB
A17
said graft monomer component being composed of 40 to 100 % by weight of methyl methacrylate and 0 to 60 % by weight of at least one monomer selected from the group consisting of an alkyl acrylate having a C_1 to C_8 alkyl group, an alkyl methacrylate having a C_2 to C_6 alkyl group, an unsaturated nitrile and an aromatic vinyl compound, and said crosslinked elastomeric polymer being composed of 79.9 to 99.99 % by weight of an alkyl acrylate having a C_2 to C_8 alkyl group, 0.01 to 5 % by weight of a polyfunctional monomer and 0 to 20 % by weight of other monomers copolymerizable therewith, and

524/625
(c) 10 to 30 parts by weight of calcium carbonate.

2. A molded article having a layer molded from the composition of Claim 1.
